High quality wood surface  
treatment products

*Advice, solutions & development*

moves your heart.

Custom-made colours

Extremely high quality

Flexibility

In-house production in the Netherlands

Outstanding price / quality ratio

60 years of experience

*Are you a parquet installer or furniture specialist involved in the design and delivery of flooring and/or furniture (indoor and outdoor) in the higher end of the market? Then you know how important the optimal protection and treatment of wooden surfaces is. For this purpose, Vesting develops high quality products and offers advice and solutions based on flexibility, creativity and service-orientation. So you not only choose wood care products of the highest quality, but also a committed and reliable partner.*

## Quality

We make fine end products of a consistent quality by using a combination of durable and high-quality raw materials. Our products are easy to use and offer unparalleled results. They are extensively tested during development. Firstly, in our own laboratory and then generally at a practical level by the craftsman. Properties such as drying, hardness, wear-resistance, water-resistance, colour and aesthetic result are carefully evaluated.

## Innovation

We create new technologies from the creative ideas of our customers working in cooperation with us, which lead to exceptional results. For example, the application of effect pigments from the automotive industry in a turpentine wax or wax oil, gives an exclusive character to the treated surface. We also try to make use of renewable and environmentally friendly raw materials in our new techniques and developments.

## Distinctiveness

We are constantly adapting our production to the various changing markets and responding to trends by means of our distinctive product ranges. We have, among other things, the Nazir collection (colour oils with gold, silver and pearl appearance) but also nature-based, substantially solvent-free natural oil modifications from renewable sources.

Because we utilise, among other things, special dyes, for example to create a water-based stain, we achieve a more special effect on wooden surfaces. This, in combination with a wax oil colour finish means that the creative pallet of possibilities is enormous! Did you know that some of our products can even be used on stone and metal surfaces?

## Service

Each company has its own needs and gives priority to different products. Due to our product knowledge accumulated over many years and our extensive product range, De Vesting has a solution to every problem in the field of wooden surface treatment.

## Multi-talented

Are you looking for a versatile consultant and a critical and goal-oriented sparring partner, who is always interested in new opportunities for quality improvement and cost control?

De Vesting has years of experience in protecting and treating wooden surfaces in the floor and (outdoor) furniture industry. We have our own development and production facilities in the Netherlands, which allows us to be fast and flexible.

In addition, increasingly often we are contracted as a consultant in the field of custom-made colours and compounds. In every case we show our strength: the drive to work with the customer to achieve the best solutions and to constantly strive for the most attractive result. We are true to our motto 'moves your heart' day in, day out.

## Would you like to find out more?

Partnership proves itself in practice. That is why we are happy to cooperate with you. Would you like to exchange ideas – whether or not concerning a specific project? Then feel free to contact us.
